

Universitätsklinikum Hamburg-Eppendorf
Institut und Poliklinik für Medizinische Psychologie

hche | Hamburg Center
for Health Economics

We are looking to hire a:

Student Research Assistant

The research assistant will assist in the coordination of projects focused on health care interventions and prevention sciences. Duties and responsibilities include assisting with survey development, study recruitment, administering surveys and conducting interviews with patients, data analysis, and other administrative tasks as needed. Working time will be 10 hours per week.

We offer:

- Getting to know scientific work in the field of health services research, epidemiology and psychology.
- Gaining practical experience in patient-oriented research

The ideal candidate should have:

- A background in public health, health economics, epidemiology, psychology or relevant field
- Ability to communicate in English as well as German
- Interest in scientific work
- Basic knowledge of the data processing program SPSS is desirable
- Experience with Qualtrics or another survey platform is a plus

We are looking forward to receiving a short cover letter and your CV. Feel free to send them by email to:

Dr. Kathleen Gali (kathleen.gali@uni-hamburg.de) and/or Frederike Bokemeyer (f.bokemeyer@uke.de)
