

Prof. Dr. Timo Mandler, Toulouse Business School  
Prof. Dr. Karen Gedenk, University of Hamburg

PhD Course

## Survey Research

Winter Term 2023/24

### Dates

Part I: Survey design & execution (Timo Mandler)

Day 1: December 4, 2023, 9 am – 4 pm

Day 2: December 18, 2023, 9 am – 4 pm

Part II: Analysis of survey data (Karen Gedenk)

Day 3: January 15, 2024, 9 am – 4 pm

Day 4: February 5, 2024, 9 am – 4 pm

### Location

On campus (University of Hamburg).

### Objectives

This course is designed to lay the foundations of good survey-based research in different areas of Business Administration. It aims at (1) familiarizing students with key issues in designing surveys and equipping them with the necessary practical skills to implement and execute surveys efficiently, and (2) teaching them how to address various challenges related to the analysis of survey data. The course provides students with an overview of the survey research “tool box”.

The course will take the form of four all-day workshops, with an emphasis on student participation. Presentations on key issues related to the design, implementation, and execution of surveys as well as to the analysis of survey data will be accompanied by practical demonstrations, in-class exercises, and assignments.

### Credits

The course is worth 5 LP (Leistungspunkte/credit points). To pass the course, participants are required to participate actively on all four days, and to hand in two assignments. Each assignment will be reviewed by an instructor and a peer. Selected assignments will be discussed in class.

- The first assignment involves the design and implementation of a survey on a topic of choice. It is due on December 13, and will be discussed in class on Day 2.
- The second assignment involves the analysis of data, using at least one method that participants would like to familiarize themselves with. Participants can either analyze their own datasets or use a training dataset provided by the instructors. The second assignment is due on January 31, and will be discussed in class on Day 4.

Further details on the assignments will be provided in class. Please reserve a sufficient amount of time in the weeks after Day 1 and Day 3 for the assignments.

Students who participate only in part I or part II of the course, and successfully complete the respective assignment, receive 2.5 LP.

### Prerequisites

Students need access to a survey platform (e.g., Qualtrics, LimeSurvey) and to a statistics software package (e.g., Stata, R). Students should be familiar with the basics of multivariate data analysis.

### Contents

#### Part I: Survey design & execution

##### *Day 1: Introduction to survey design*

- Selecting the right sample
- Adopting and adapting measurement instruments
- Designing questionnaires that engage respondents
- Safeguarding validity
- Enhancing response rates
- Navigating Qualtrics efficiently
- Constructing dynamic questionnaires
- Pretesting surveys effectively

##### *Day 2: Applied survey design & execution*

Part A: Peer-review of surveys (assignment 1)

Part B: Data collection & treatment

- Choosing a panel provider
- Documenting the data collection
- Cleaning and preparing data for analysis

#### Part II: Analysis of survey data

##### *Day 3: Introduction to survey data analysis*

- Testing for biases: non-response bias, common method bias
- Validating measurement models
- Analyzing simple relationships: multicollinearity, non-linear effects

- Analyzing complex relationships: moderation & mediation, interaction terms, structural equation models
- Choice models

*Day 4: Advanced problems in survey data analysis & applications*

Part A: Advanced topics:

- Heterogeneity
- Endogeneity

Part B: Student analyses (assignment 2)

### Instructors

Timo Mandler is Associate Professor of Marketing at Toulouse Business School, France. His research interests include global/local branding, cross-cultural consumer behavior, and methodological issues in international marketing research. His work has been published in leading journals like the *Journal of International Business Studies*, *Journal of International Marketing*, *International Marketing Review*, and *Journal of Business Research*.

Karen Gedenk is Professor of Marketing at the University of Hamburg. Her research focuses on pricing and promotions. She studies the effects of these marketing instruments empirically, using market data and surveys. Her work has been published in major journals like *Marketing Science*, *Journal of Marketing Research*, *Journal of Marketing*, and *International Journal of Research in Marketing*.

### Registration

Students who want to attend this course need to register via STiNE (<https://www.stine.uni-hamburg.de>) until November 1, 2023. For students from outside the University of Hamburg, please register via email to Elke Thoma ([elke.thoma@uni-hamburg.de](mailto:elke.thoma@uni-hamburg.de)) which informs about:

- your name
- your email address
- the supervisor of your doctoral thesis and topic
- your background in statistics and empirical research.

### Co-ordination/Contact

Prof. Dr. Karen Gedenk ([karen.gedenk@uni-hamburg.de](mailto:karen.gedenk@uni-hamburg.de))

For all organizational issues, please contact Elke Thoma ([elke.thoma@uni-hamburg.de](mailto:elke.thoma@uni-hamburg.de))
