

# Urban Transport Week

2015 @ Hamburg University of Technology

14. 09 - 02.10.2015

Sustainable solutions - Latest trends in science and practice  
International job perspectives

*Patronage: Prof. Kurt Bodewig, former Federal German Minister of Transportation and Infrastructure*

Transport is one of the most pressing global issues of the future! The world needs determined and creative professionals, able to understand the scope of the problem and to envision applicable strategies beyond purely technical innovations.

## What makes the Urban Transport Week so unique?

- Get in touch with the international transport community!
- Learn from international expertise and get to know latest achievements and approaches
- Discuss with fellow students and young professionals
- Design new strategies and solutions & win a scholarship
- Make valuable contacts with potential employers and future colleagues
- Enjoy think tank sessions with practical work on a real transport issues

Each Module is open for up to 30 students, PHD students, and young professionals.  
Check out the accountability of the Urban Transport Week at your Institution (1 ECTS / week)

We have designed three modules on main issues of urban transport.

### Module I

Metropolitan  
Accessibility

14.09. - 18.09.2015
