

Urban Transport Week

2015 @ Hamburg University of Technology

Sustainable Solutions

Latest trends in Science and Practice

International Job Perspectives

Transport is one of the most pressing global issues of the future! The world needs determined and creative professionals, able to understand the scope of the problem and to envision applicable strategies beyond purely technical innovations.

Get in touch with the international transport community!

- learn from international experts
- discuss with fellow students and young professionals
- design new strategies and solutions & win a scholarship
- make valuable contacts with potential employers or future colleagues

The 3 Modules you can choose from:
